

### **Waterfest 23, the Largest Audi and VW Tuning Show in North America**

**Ultimate tuning and modification show!** Waterfest may not have created the classic tuning show genre, but the event has certainly perfected the model. Now in its 23<sup>rd</sup> year running, the show has become the largest Audi and VW tuning event in North America. It's managed this through the consistent application of elements such as a judged show field, vendor area, autocross, drag racing, dyno and burnout competitions.

Set in Englishtown New Jersey at the expansive Raceway Park complex, this show is the ultimate for anyone serious about modification and tuning of Audi and Volkswagen automobiles. Enter your car into the show, the racing or one of the competitions...or just park it and walk the largest gathering of Audi tuners and vendors you'll find in one place.

Near the center of the vast vendor area will be the Audi Club North America display. A great place to grab a cool drink or meet up with other Audi enthusiasts in order to set out and take in row after row of intensely loved and heavily modified automobiles.
